The *only* mattress  
recognized by  
NASA  
and certified by the  
Space Foundation

### Soft...firm...everything in-between

Tempur-Pedic's Weightless Sleep bed actually molds itself to your body. Our sleep technology is recognized by NASA, raved about by the media, extolled by over 25,000 medical professionals worldwide.

Yet this miracle has to be *felt* to be believed.

While the thick, ornate pads that cover most mattresses are necessary to keep the hard steel springs inside, they create a hammock effect outside—and can actually cause pressure points. Inside our bed, billions of microscopically memory cells function as molecular springs that contour precisely to your every curve and angle.

Tempur-Pedic's Swedish scientists used NASA's early anti-G-force research to invent a new kind of viscoelastic bedding—TEMPUR pressure-relieving material—that reacts to body mass and temperature. It *self-adjusts* to your exact shape and weight. And it's the reason why millions of Americans are falling in love with the first *really* new bed in 75 years: our high-tech Weightless Sleep marvel.

Small wonder, 3 out of 4 Tempur-Pedic owners go out of their way to recommend our Swedish Sleep System\* to close friends and relatives. And 82% tell us it's the *best* bed they've ever had!

Please return the coupon at right, without the least obligation, for a FREE DEMONSTRATION KIT. Better yet, phone or send us a fax.

FREE SAMPLE of TEMPUR® pressure-relieving material—the molecular heart of Tempur-Pedic's legendary Weightless Sleep™ bed—is yours for the asking. You also get a free video and Free Home Tryout Certificate.
